ROOTED IN NATURE DESIGNED FOR FUTURE

About Us

Terracane is at the forefront of sustainable innovation in disposable tableware. Driven by purpose and powered by nature, we design and manufacture eco-friendly alternatives that help the world move away from single-use plastic. Every product we create is a step toward a cleaner, greener planet—without sacrificing convenience or quality.

Our Mission

We're on a mission to transform the food service industry by offering affordable, high-performance, and planet-friendly packaging solutions. Terracane empowers businesses and consumers to make better choices—choices that protect the environment without compromising experience.

Our Product Lineup

Crafted from renewable plant-based materials like bagasse, bamboo, and cornstarch, our collection is engineered for both performance and sustainability:

- Plates & Bowls – Strong, leak-resistant, and compostable—perfect for everyday meals or events.
- Cutlery – Durable forks, spoons, and knives made from eco-safe materials.
- Cups & Lids – Ideal for hot or cold beverages; fully biodegradable and heat-safe.
- Takeaway Containers – Smart, sustainable packaging solutions for food businesses.
- Straws & Stirrers – Functional, earth-friendly drink accessories for on-the-go use.

Why Terracane?

- Planet-First Materials – Sourced from agricultural by-products and renewable plants.
- Performance You Can Trust – Heat-resistant, sturdy, and built for real-world use.
- Earth-Friendly Disposal – 100% compostable and biodegradable.
- Safe for Food & Drink – Non-toxic, chemical-free, and globally certified.
- Custom Solutions – From branded designs to bulk supply—we scale with your vision.

Industries We Serve

- Restaurants & Cafes
- Hotels & Hospitality
- Catering & Event Planners
- Food Delivery & Takeaway
- Retailers & Supermarkets

OUR PRODUCT APPLICATION

Elevate Your Environment

Promoting Sustainability with Purpose:

Sustainability isn't just part of our promise—it's the foundation of everything we do. At Terracane, we're redefining eco-conscious living by transforming agricultural byproducts into high-quality, biodegradable tableware. Every plate, bowl, and clamshell we create helps protect the planet while empowering local communities.

Locally Sourced. Globally Responsible:

We partner with nearby farms to responsibly source premium bagasse, reducing our carbon footprint while uplifting local economies. This localized approach ensures sustainable harvesting, strengthens regional supply chains, and minimizes emissions from long-distance transport.

Guardians of Green:

Our materials are harvested through methods that protect forest biodiversity and preserve ecosystems. By choosing sustainability at every step, we actively fight deforestation and support thriving habitats—making every product a stand for environmental preservation.

Empowering People. Enriching Communities :

Our commitment goes beyond eco-friendliness. We work hand-in-hand with local farmers and laborers to secure stable livelihoods and promote ethical forestry practices. Together, we're building a stronger, more sustainable future—one community at a time.

Zero Waste. Infinite Impact:

Our production process is designed for circularity. From sourcing to manufacturing, every step is optimized to reduce waste, with byproducts either recycled or composted. When you choose Terracane, you're not just choosing better products—you're choosing a better planet.

The Terracane Sustainability Cycle

From Farm to Table-and Back to Earth

Sugarcane Farming

Farmers grow sugarcane for juice extraction. After extracting juice, the leftover bagasse (fiber) is often discarded or burned causing pollution.

Bagasse Collection

Instead of letting it go to waste, we collect this bagasse from local mills, giving new life to agricultural by-products.

Eco-Friendly Manufacturing

The bagasse is processed and molded into strong, biodegradable tableware using minimal water, no plastic, and clean energy practices.

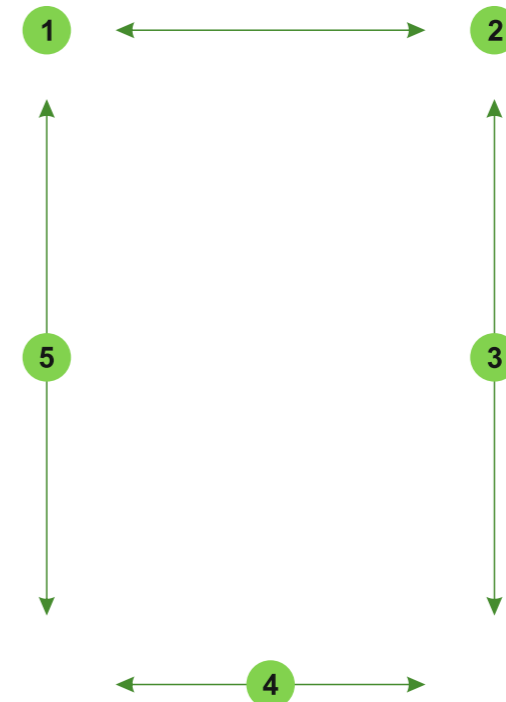

Everyday Use

Our products are used by restaurants, caterers, cafes, and individuals for serving food and beverages—safe, stylish, and sustainable.

Composting & Breakdown

After use, Terracane tableware decomposes naturally within 50-90 days, turning into nutrient-rich compost—without leaving any toxic trace. Stylish, and sustainable.
